

SDM 1 - Photometer for semen concentration analysis

Quick, accurate, easy

The SDM 1 is a compact, highly accurate photometer developed for measuring sperm concentrations. It can be calibrated for porcine, bovine, equine, canine and small ruminant species. Cleaning is simple, maintenance is minimal. The semen concentration is displayed in million sperm/ml.

Your benefits

- No dilution of semen samples necessary
- LED light source provides stable output, thereby reducing the frequent need for recalibration
- Cuvette is securely fixed in the correct measuring position
- User activates analysis once cuvette is in position
- Multiple readings of each sample are automatically performed and averaged to provide an accurate result
- Easy to clean and maintain: Simply lift the lid of the cuvette holder and wipe clean
- Calibration is performed automatically with each sample measurement
- Software updates are performed by interface connection

Result in million sperms/ml

Technical details

- Weight: 1.5 kg (net weight)
- Size: 25 x 13 x 5.5 cm (approx.)
- Display: LED
- Power supply: 110-240 V/50-60 Hz and battery
